

Statesman

PREMIUM & STANDARD

Statesman | Premium

- Double skin cabinet with double skin roof and door

Statesman | Standard

- Single skin cabinet with double skin roof and door

The **Statesman portable toilet** is our best-selling portable toilet due to its *versatility* and *durability*. With the largest waste tank capacity on the market, this toilet can be used for a wide range of industries including:

- Construction sites
- Civil construction and quarries
- Farms
- Private backyards
- Camping and events
- Home builders
- Industrial and commercial

The **Statesman** is available in a Standard single skin cabinet or Premium double skin cabinet and can be fitted with a rear waste valve, making it easy to empty the waste tank yourself. Other accessories such as lights and soap dispensers are common favourites among customers.

For ultimate versatility, the Statesman can be mounted to a galvanised steel Single or Double Trailer. This is especially popular for farms, civil construction sites and regional areas where toilets need to be moved regularly.

Statesman

PREMIUM & STANDARD

Premium Materials

Our toilets are manufactured from premium materials, they don't have regrind plastic or cheaper top up additives mixed into the product. The cabinet roof, door and wall panels are made from 3mm virgin high density polyethylene (HDPE) with UV additive, thus the cabinets retain their colour and look great for years. The toilet base is made from low density polyethylene (LDDPE) and is one of the toughest plastics around and is impervious to water absorption. This ensures that the base can withstand the rigours of frequent everyday usage. Also, to help keep your toilet looking great we've added a Teflon non-stick coating (like your frying pan) to the surface of the stainless-steel toilet bowl flap.

Trailer Mounted Units

For ultimate mobility, mount your toilet unit to one of our galvanised steel trailer options (with brakes):

Single Trailer: fits one portable toilet. **Double Trailer:** fits two portable toilets.
